

ALUMINA GRINDING BALL (DRY GRINDING)

Application:

It is great grinding media, widely used for metal and nonmetal's dry powder grinding equipment

Properties:

Formed by isostatic pressure molding, Good toughness, can greatly improve the grinding efficiency, reduce the loss of grinding media.

Chemical Composition & Technical Parameter

Item	AK-92	AK-95
Al ₂ O ₃ (%)	≧ 92	≧ 95
Bulk DENSITY (g/cm ³)	≧ 3.60	≧ 3.65
Hardness (Mohs)	9	9
Wear Loss (%)	<0.015	<0.012
Water Absorption (%)	<0.01	<0.01
Color	White	White
Size (mm)	13-90mm	

Customized: Particle size can be prepared according to customer's requirement.
